Acuitas

As an ISO 9001 certified company, Acuitas is committed to a process of continuous improvement. This commitment is 'raising the bar' in the FM industry both locally and regionally through its work processes and through its affiliations with organizations such as the Trinidad and Tobago Chapter of IFMA and the Chamber of Industry and Commerce's FM&M Committee. In keeping with our objectives of growing the company synergistically and continuing to bring additional value to our clients, we have formed a strategic partnership with an international leader in FM consultancy, Facility Engineering Associates (FEA) to create the Acuitas-FEA alliance.

The Acuitas FM – FEA alliance provides facility management consultancy services to the public and private sectors who are seeking the benefits of improved operational performance.

The Acuitas FM – FEA strategic alliance brings with it, world class technical support, knowledge and expertise. It is a working blend of local and foreign "best practices" and represents the best of both worlds. The combined team comprises facility managers and multi-disciplinary professionals including engineers, architects, quantity surveyors, safety professionals and other subject matter experts.

The combined team's core competencies are:

Facility Management
Organizational Evaluations
Facility Condition Assessments
Energy Management
Facility Commissioning

O&M Performance Evaluations
LEED® Certification and Maintenance
Facility Restoration
Sustainability Services
FM Technology Planning & Implementation

FEA is a global leader in the FM consulting industry with their corporate headquarters in Washington, DC and multiple offices throughout North America, with over 20 years of industry experience servicing the needs of clients such as the Smithsonian Institution, the Department of Defense and NASA.

Capitalizing on this vast experience, FEA has developed an efficient, comprehensive FM diagnostic tool called **fmDiagnostics™** to successfully evaluate a Client's facility management resource capabilities, its strengths and weaknesses and assess them against both the needs of the Client and operational and financial benchmarks.

Through this proprietary tool, **fmDiagnostics™** for which Acuitas FM is the sole licensed agent for the Caribbean, a 'fact-finding' and evaluation process can be undertaken to select a 'best fit' FM operational plan with specific targets towards which the Client's personnel and organization can work. The Acuitas-FEA Alliance working with the Client, will provide the guidance, technical expertise and support to ensure the Client achieves its goals and derives the maximum benefit.
